## To WHOM IT MAY CONCERN,

Hello, my name is Borbala Mester. I would like to express my interest in applying for the Software Application Developer

A little bit about myself: I am an experienced software engineer looking for a new challenge. Over the last 3 years I have worked extensively with various frontend and backend technologies, as well as CMS. These include JavaScript, jQuery, Vue, React, PHP, Laravel, HTML, Bootstrap, CSS, Node JS, My SQL, WordPress, Java and Drupal. I am a very quick learner and creative problem solver can overcome any obstacle!

I recently graduated from Algonquin College, completing my degree in Interactive Media Design. As well as my extensive technical knowledge, I provide personal traits such as a strong work ethic, an eye for detail, and a passion for coding that I express by not only getting the job done but going above and beyond for projects. I am certain that my positive can-do attitude and passion for coding will make me a perfect addition to i-Sight

Thank you for taking the time to review my resume and cover letter. I look forward to speaking with you .

Sincerely,

Borbala Mester
